PROJECTS

Java Chess Application (OOP Project)

Group Project (2024)

- Developed a GUI-based chess game in Java using object-oriented programming principles
- Implemented core game logic including legal move validation and standard chess rules
- Added advanced features such as check/checkmate detection and special moves (castling, en passant, pawn promotion)
- Designed a responsive and user-friendly interface for smooth gameplay experience

Inspire Me Website | HTML, CSS, JavaScript

Personal Project (2025)

- Built a responsive motivational web app using HTML, CSS, and JavaScript
- Integrated dynamic quote generation with smooth UI transitions and animations
- Focused on responsive design and minimal UI for better user engagement
